

PRETREATMENT ADVISE AND POST CARE FOR MACHINE AND MICROBLADE BROWS

Preparing for the procedure can make a big impact leading to positive results before Microblading and Powder brows. **NOTE!!!! You must again refer to these recommendations PRIOR TO YOUR TOUCH UP at 6 weeks.**

The following will insure a good result and better healing experience.

- 1- No Botox 3 weeks before
- 2- No Retinol or Vitamin A skincare products 3-4 weeks before
- 3- No peels or facials 1-2 weeks before
- 4- No tanning or sunburned face
- 5- No tweezing or waxing the week before
- 6- No fish oils, aspirin, or Vitamin E a week before
- 7- No tinting 3 days before
- 8- No alcohol 24-48 hours before
- 9- No caffeine before coming to procedure
- 10- No Accutaine for 4-6 months

POST CARE 7 DAYS

After procedure, gently dab or wipe with a baby wipe any blood or lymph that may be a result of the numbing agent wearing off. Follow with a teeny bit of ointment supplied to you. Discontinue when wipe is fairly clean. This will be explained to you after procedure is completed.

Apply a SPARING amount of Bacitracin daily unless allergic to it. If allergic brow area will get red swollen and possibly itchy. DISCONTINUE USE AND WASH AND ALLOW TO DRY. USE ONLY OINTMENT SUPPLIED TO YOU.

DO NOT OVER LUBRICATE OR ALLOW TO GET DRY! WIPE WITH A BABY WIPE BEFORE APPLYING NEXT SUPPLIED OINTMENT. THINK MORNING LUNCH LATE AFTERNOON BEDTIME. IF YOU HAVE OILY SKIN LESS APPLICATIONS.

AVOID CEILING FANS. It dries them out. Please sleep on clean pillow cases and do not sleep on your face.

Do not get wet for 5 days (three days on machine brows) Take 5 minute showers washing hair last and cover the best you can. After 5 days wash with a little baby shampoo or antibacterial soap bubbles. Follow with a SPARING amount of ointment.

AVOID sweat, steam, water, pools, lakes, ocean and full force of the shower.

PLEASE follow all post care advice to achieve the best result. We do our best as technicians to optimally complete work but it is IN YOUR HANDS after you leave. If you do not take care of it properly you risk infection and poor result. Microblading is a semi-permanent procedure and can last a year or two with proper care. Use sunscreen and avoid Retin A and Glycolic products on brows.

If you have questions, PLEASE do not hesitate to contact this office. Thank you! Enjoy your new beautiful makeup!
